(a) IEEE 33-bus, measured
Naive exhaustive (solid, single faults)
Radiality-pruned (solid, single faults)
Decentralized (solid, single faults)
Naive exhaustive (dashed, double faults)
Radiality-pruned (dashed, double faults)
Decentralized (dashed, double faults)
500 ms deadline
Search time (ms)
Tie switches T
(b) Decentralized vs. pruned optimum
Single faults
Double faults
Optimality gap (pp of total load)
Tie switches T
(c) Per-solve cost vs. network size
PEGASE 2869
PEGASE 1354
IEEE 300
Oberrhein 179
IEEE 118
IEEE 33
One AC power flow (ms)
